MEMORANDUM

TO: Jesus Olivares, Director, Parks and Recreation Department

FROM: E. Anne Scharlach, P.E., Project Manager, Public Works Department

DATE: September 11, 2002

RE: West University Area Overflow Abatement Project;
Use Agreement for proposed wastewater lines in City of Austin Parkland

The purpose of this memo is to request the use of City of Austin Parkland for the installation of wastewater pipelines to be constructed as part of the West University Area Overflow Abatement Project Phase 2. The construction is proposed to take place in December 2002 or January 2003. The affected parkland is east of Lamar Boulevard, south of the San Gabriel Street intersection. It is indicated on PARD maps as being part of the Shoal Creek Greenbelt.

Attached are a general location map and applicable sheets from the project construction drawings.

The West University Area Overflow Abatement Project will include replacement of deteriorating wastewater infrastructure serving residential area generally bordered by Shoal Creek to the west, Rio Grande Street to the east, West 30th Street to the north, and Poplar Street to the south, where repeat wastewater overflows have occurred. This is one of the initial projects in Water & Wastewater Utility's Clean Water Program (ACWP), which was developed to respond to the requirements of an EPA Administrative Order regarding Sanitary Sewer Overflows.

The proposed construction within City parkland includes the installation of a 12-inch diameter wastewater line along San Gabriel Street from 28 ½ St. to Lamar Blvd, and then south along the eastern edge of Lamar for approximately 600 feet to connect to an existing 18-inch line in Lamar. The proposed alignment is primarily within the Lamar Blvd. right-of-way, outside of the pavement. However, due to the curvature of the road, and to avoid trees in the Right-of-Way, the proposed alignment will encroach into the

parkland at some locations. In addition, two existing 8-inch diameter lines are proposed to be replaced/relocated within this same greenbelt area. The total length of the replacement pipeline is approximately 410 feet. All the proposed construction within parkland will be designed and constructed in compliance with the "Construction in City Parkland" criteria in the City's Environmental Criteria Manual.

I am requesting that review of this proposed Use Agreement be scheduled on Land and Facilities Subcommittee agenda for September 17, 2002 and the Parks Board agenda for September 24, 2002. I have discussed this project, and these proposed agenda dates, with Stuart Strong. I am also working with Ms. Junie Plummer of the Public Works Department Real Estate Services Division to schedule the Public Hearing at City Council. Please contact me at 974-5626 if there is additional information required, or if you have any questions.
